

Comment on Proposed Groundwater Development Project

REC'D - BLM - NSO
9:00 AM SEP 29 2011

We are farmers living near Delta, Millard County Utah. We are responsible for nearly 1700 acres of flood irrigated cropland which we own and lease. We understand the importance of water to the production of our alfalfa hay, corn and grains. This is an occupation we hope to pass on the future generations.

Our question concerning the Southern Nevada Water Project is quite simply: If there is water for this project, *'Where is it going today'? Where did it go 10 years ago? Where did it go 100 years ago? 1000 years ago?*

Thank you for your consideration.
